Introduction

Create a web page using R Markdown that features a map created with Leaflet.

Host your webpage on either GitHub Pages, RPubS, or NeoCities.

Here, I am going to show the map of National University of Singapore.

My first map

```
library(leaflet)
library(dplyr)
```

```
##
## Attaching package: 'dplyr'
```

```
## The following objects are masked from 'package:stats':
##
##   filter, lag
```

```
## The following objects are masked from 'package:base':
##
##   intersect, setdiff, setequal, union
```

```
NUS = c("<a href= 'http://www.nus.edu.sg/' >National University of Singapore</a>")
```

```
map = leaflet() %>%
  addTiles() %>%
  addMarkers(lng=103.7764,lat=1.2966, popup=NUS)
```

```
map
```
